1       *Be it enacted by the Senate and House of Representa-*  
2       *tives of the United States of America in Congress assembled,*

3       **SECTION 1. SHORT TITLE.**

4       This Act may be cited as the “Social Determinants  
5       Accelerator Act of 2021”.

6       **SEC. 2. FINDINGS; PURPOSES.**

7       (a) FINDINGS.—Congress finds the following:

1                         (1) There is a significant body of evidence  
2 showing that economic and social conditions have a  
3 powerful impact on individual and population health  
4 outcomes and well-being, as well as medical costs.

5                         (2) State, local, and Tribal governments and  
6 the service delivery partners of such governments  
7 face significant challenges in coordinating benefits  
8 and services delivered through the Medicaid program  
9 and other social services programs because of the  
10 fragmented and complex nature of Federal and  
11 State funding and administrative requirements.

12                         (3) The Federal Government should prioritize  
13 and proactively assist State and local governments  
14 to strengthen the capacity of State and local govern-  
15 ments to improve health and social outcomes for in-  
16 dividuals, thereby improving cost-effectiveness and  
17 return on investment.

18                         (b) PURPOSES.—The purposes of this Act are as fol-  
19 lows:

20                         (1) To establish effective, coordinated Federal  
21 technical assistance to help State and local govern-  
22 ments to improve outcomes and cost-effectiveness of,  
23 and return on investment from, health and social  
24 services programs.

1                         (2) To build a pipeline of State and locally de-  
2                         signed, cross-sector interventions and strategies that  
3                         generate rigorous evidence about how to improve  
4                         health and social outcomes, and increase the cost-ef-  
5                         fectiveness of, and return on investment from, Fed-  
6                         eral, State, local, and Tribal health and social serv-  
7                         ices programs.

8                         (3) To enlist State and local governments and  
9                         the service providers of such governments as part-  
10                         ners in identifying Federal statutory, regulatory, and  
11                         administrative challenges in improving the health  
12                         and social outcomes of, cost-effectiveness of, and re-  
13                         turn on investment from, Federal spending on indi-  
14                         viduals enrolled in Medicaid.

15                         (4) To develop strategies to improve health and  
16                         social outcomes without denying services to, or re-  
17                         stricting the eligibility of, vulnerable populations.
